

**Junior Consultant (1-3 years of experience) - London based**

### About us

Veltys is a strategy consulting firm that specialises in data analysis and statistical modelling. Created in 2013, Veltys ambition is to become the key partner for organizations that want to build their strategy on data intelligence and economic theory, as well as transforming their way of thinking to create value.

Our client is a start-up supporting by an international firm that provides a booking solution for the different actors in the advertising sector. We are looking for a junior consultant to work with our client, at their London office for a long-term project (2 years).

### Your role

You will integrate into the data team as a data scientist and work on the development of an automatic pricing algorithm as well as other data analytics related projects.

You will be working closely with a senior consultant from Veltys (based in London) to deliver insight and solutions to our international customers (Europe, North and South America, Asia). You will also be working with a small team based in Paris.

### Responsibilities

- Maintain and improve the different algorithms already in place using Statistics, Econometrics or Machine Learning techniques
- Collaborate with the Product Managers to define our customers' needs and provide them with actionable solutions
- Analyse data and present the results in a clear manner to the different stakeholders (customers, management teams, developers)
- Work with a wide range of in-house data and propose new solutions to solve business problems
- Work with the Developers and the Data Engineers to implement and automate these solutions

### Required skills

- A Master's degree in Statistics, Economics, Econometrics, Applied Mathematics or other Quantitative Field of Study from a "Grande École" or a top-tier University
- Advanced knowledge of Python or R
- A proven ability to work in an international environment and with people from diverse educational backgrounds
- Strong interpersonal skills and a client-oriented mind
- Excellent verbal and written communication skills in both English and French
- Willingness to travel
- Knowledge of Java and experience working in a cloud-based environment are a plus

### What we offer

- A full-time position (CDI)
- Even though you will be based in London, you will be employed in France, seconded to the UK
- 25 days holiday + RTT (around 10 days)
- French Social Security benefits
- Relocation package
- Frequent Eurostar tickets to Paris (around one per month)
- Salary commensurate with experience: range 39K € - 49K € + a 35% cost of living allowance once in London + Bonus
- Company saving scheme (PEE – Plan d'Épargne Entreprise)
- Discounted Oyster travel card (50%)

At the end of the 2-year project in London, you will reintegrate the Veltys core team in Paris or in London as a consultant.

### Application process

If you fit the above job description, please send your résumé and cover letter to [recrutement@veltys.com](mailto:recrutement@veltys.com) with the following e-mail title: "Junior Consultant London Application".

If your application is successful, we will invite you to meet us at our office in Paris. The interview process typically consists in 1 or 2 rounds with Senior Consultants and/or one of the Managing Directors.
